**POLICY
IN QUALITY**

The activities of the Department of Environmental Safety of LLC MIP NES ProfExpert are aimed at ensuring competent, objective performance of work on the validation and verification of greenhouse gas emissions.

The constant goal in the field of quality of the Department of Environmental Safety of LLC MIP "NES ProfExpert" is:

- meeting the needs of the Client, as well as:
- ensuring competent, objective work on validation and verification of greenhouse gas emissions;
- the absence of justified complaints, appeals and disputes of the Clients and inconsistencies during various inspections, indicating biased and insufficiently competent work on the validation and verification of greenhouse gas emissions.

The quality of the work provided for the validation and verification of greenhouse gas emissions is guaranteed by:

- compliance with international agreements and legislative requirements of the Russian Federation;
- maintaining feedback with Clients and taking into account their preferences when improving the quality of services;
- improving the qualifications and level of responsibility of personnel for the quality of work performed;
- reduction of risks and focus on the prevention of nonconformities;
- impartiality in relation to activities subject to validation and verification, without preferences and conflicts of interest;
- objectivity in the validation and verification process, so that the data obtained and the conclusions drawn from them are based on objective evidence obtained in the validation and verification process.

The main tasks of the quality management system of the Environmental Safety Department are:

- maintaining the ability of the Environmental Safety Department to provide services that meet the

Отдел экологической безопасности	Политика в области качества (ред. 2)	СМК-01-02-2022
Department of Environmental Safety	Quality policy (ed. 2)	QMS-01-02-2022

established requirements and requirements of the Clients, as an authorized operational body with the appropriate level of competence, incl. through the functioning of the quality management system in the Department of Environmental Safety;

- identifying deviations from the management system or from the procedures for performing validation and verification of greenhouse gas emissions and initiating measures to prevent or minimize such deviations;
- willingness to demonstrate the ability to competently conduct validation and verification of greenhouse gas emissions to all interested parties;
- continuous improvement of the effectiveness of the quality management system of the Department of Environmental Safety;
- involvement of all personnel of the Environmental Safety Department in the quality management process.

The management of the Department of Environmental Safety undertakes:

- follow the guidance documents of the Conference of the Parties serving as the Meeting of the Parties to the Kyoto Protocol when performing validation and verification activities;
- comply with the requirements of CDM-EB46-A02-STAN "CDM Accreditation Standard" when performing validation and verification work;
- familiarize the personnel of the Environmental Safety Department with the documents of the quality management system (under signature);
 - ensure that validation and verification work is carried out competently;
- ensure reasonable, impartial and objective work on validation and verification, confidentiality of information of the Clients, observance of the property rights of the Clients;
- ensure non-participation of employees of the Department of Environmental Safety in activities that call into question the impartiality of the judgments of the center;

Employees of the Department of Environmental Safety undertake:

- be guided in their activities by the documents of the quality management system, this quality policy,
- get acquainted with the documents of the quality management system in the prescribed manner and accept for execution;
- comply with the requirements of CDM-EB46-A02-STAN "CDM Accreditation Standard";
- strive for continual improvement in the effectiveness of the management system.

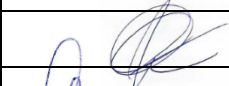

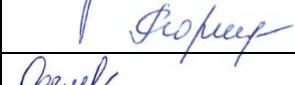

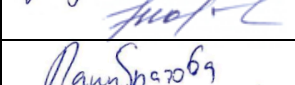

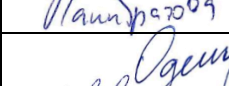

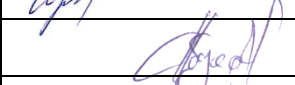

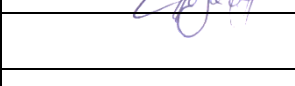

The management of the organization is responsible for:

- creation and maintenance of the conditions necessary for the effective functioning of the quality management system in order to ensure the high quality of work in the Environmental Safety Department;
- the absence of any administrative, commercial, financial or other pressure on the employees of the Environmental Safety Division, which could influence their Reports and Conclusions and jeopardize the independence in connection with the testing activities;
- the establishment and operation of a system for managing risks and opportunities associated with validation and verification activities, as well as obligations to take action in relation to such risks and opportunities.
