I APPROVED

Director

LLC MIP "NES ProfExpert"

Kamaliyev Damir Sagdievich

"1" October 2023

QUALITY POLICY

The activities of the Environmental Safety Department of MIP "NES Profexpert" LLC are aimed at ensuring competent, objective performance of work on validation and verification of greenhouse gas emissions.

The constant goal in the field of quality of the Environmental Safety Department of LLC MIP "NES Profexpert" is:

- meeting the needs of Clients,
- and:
- ensuring competent, objective performance of work on validation and verification of greenhouse gas emissions;
- the absence of complaints, appeals and disputes from Clients recognized as justified and inconsistencies during various inspections, indicating biased and insufficiently competent performance of work on validation and verification of greenhouse gas emissions.

The quality of the work provided on validation and verification of greenhouse gas emissions is guaranteed:

- compliance with international agreements and legislative requirements of the Russian Federation;
- maintaining feedback with Clients and taking into account their preferences when improving the quality of services;
- increasing the qualifications and level of responsibility of personnel for the quality of work performed;
- risk reduction and focus on preventing nonconformities;
- impartiality in relation to the activities subject to validation and verification, without preferences or conflicts of interest;
- objectivity in the process of validation and verification so that the data obtained and the conclusions

Environmental Safety Department	Quality Policy (rev. 3)	SMK-01-02-2023
Department of Environmental Safety	Quality policy (ed. 3)	QMS-01-02-2023

drawn on their basis are based on objective evidence obtained in the process of validation and verification.

The main objectives of the quality management system of the Environmental Safety Department are:

- maintaining the ability of the Environmental Safety Department to provide services that meet the established requirements and requirements of Clients, as an authorized operational body with the appropriate level of competence, incl. through the functioning of the quality management system in the Environmental Safety Department;
- identifying deviations from the management system or from procedures for performing validation and verification of greenhouse gas emissions and initiating measures to prevent or minimize such deviations;
- willingness to demonstrate the ability to competently conduct validation and verification of greenhouse gas emissions to all interested parties;
- continuous improvement of the effectiveness of the quality management system of the Environmental Safety Department;
- involvement of all personnel of the Environmental Safety Department in the quality management process.

The management of the Environmental Safety Department undertakes to:

- when performing validation and verification work, follow the directive documents of the Conference of the Parties acting as the Meeting of the Parties to the Kyoto Protocol;
- comply with the requirements of CDM-EB46-A02-STAN “CDM Accreditation Standard” when performing validation and verification work;
- familiarize the staff of the Environmental Safety Department with the documents of the quality management system (for signature);
- ensure competent performance of validation and verification work;
- ensure reasonable, impartial and objective performance of validation and verification work, confidentiality of Client information, respect for Clients’ property rights
- ;
- ensure that employees of the Environmental Safety Department do not participate in activities that call into question the impartiality of the center’s judgments;

Employees of the Environmental Safety Department undertake to:

- be guided in your activities by the documents of the quality management system, this quality policy,
- familiarize yourself with the documents of the quality management system in the prescribed manner and accept for execution;
- comply with the requirements of CDM-EB46-A02-STAN “CDM Accreditation Standard”;
- strive for continuous improvement of the effectiveness of the management system.

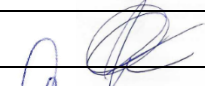

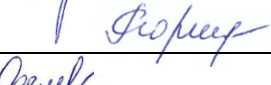

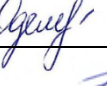

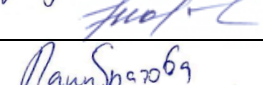

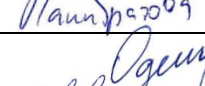

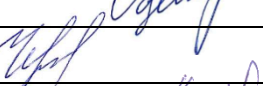

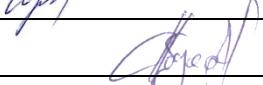

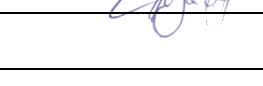

The management of the organization takes responsibility for:

- creation and maintenance of conditions necessary for the effective functioning of the quality management system in order to ensure high quality of work in the Environmental Safety Department;
- absence of any administrative, commercial, financial or other pressure on employees of the Environmental Safety Department that could influence their Reports and Conclusions and jeopardize independence in connection with testing activities;
- creation and operation of a system for managing risks and opportunities associated with validation and verification activities, as well as obligations to take actions in relation to such risks and opportunities.
